

COMMERCIAL PROPOSAL

Health & Beauty Expo

Strategic redesign and custom development of the event website

BUDGET	TIMELINE	LANGUAGES
USD 1,400	26 days	5 languages

Here is the complete proposal for the strategic redesign and custom development of the Health & Beauty Expo website:

Adil F | Fiverr Freelance

◆ Project Objective

The objective is to completely rebuild the current site in order to create a modern, professional and credible event platform, suited to the international positioning of the Health & Beauty Expo.

The new site will need to showcase the event to two main audiences:

- Visitors interested in health, beauty, wellness and medical tourism
- Exhibitors, clinics, hospital groups, brands and professional partners wishing to take part in the show

This will not be a simple modification of the current WordPress site, but a custom-built website, with a new visual identity, a clearer architecture, an optimized mobile experience and an admin panel suited to your organization.

The site will also be designed to be able to evolve progressively toward new editions, new exhibitors and new features without having to rebuild the whole platform.

◆ Public Site Structure

Premium homepage

Creation of a modern, immersive homepage allowing immediate presentation of:

- The positioning of the Health & Beauty Expo
- The date and location of the Rijswijk 2026 edition
- The sectors represented: health, beauty, medical tourism, wellness, cosmetics and innovation
- The main benefits for visitors
- The advantages for exhibitors and partners
- A selection of featured exhibitors
- Calls to action toward tickets, registrations and participation requests
- A static presentation of Paris 2027 with the mention "coming soon"

The page will be designed to reinforce the credibility of the show and quickly guide each user toward the most relevant action.

"About" page

This page will present:

- The vision of the Health & Beauty Expo
- The international positioning of the event
- The sectors and specialties represented
- The value brought to visitors
- The opportunities offered to exhibitors
- The organization and objectives of the show

The useful current content may be reused, restructured and rewritten in order to avoid the repetitions present on the existing site.

"Exhibitors" page

Creation of a professional space allowing exhibitors to be presented more fully than on the current site:

- Exhibitor logo
- Name of the company, clinic or brand
- Category or business sector
- Short presentation
- Key information
- Related visual or media
- Contact link or action button, when necessary

Exhibitors may be added, edited, sorted or removed from the admin panel.

"Tickets" page

Creation of a genuine Tickets page including:

- Presentation of access terms
- Practical information
- Dates and times
- Event location
- Any conditions
- Clearly visible purchase button

Ticket sales and payment will not be handled directly on the site. The button will redirect to the external ticketing platform provided by your team.

"Fair Match" page

The Fair Match module will be delivered in the agreed form:

- Information page explaining the service
- Presentation of the benefits for visitors and exhibitors
- Explanation of how it works
- Contact form or matchmaking request form
- Forwarding of requests to the organizing team

This offer does not include an automatic matching algorithm, instant messaging, or a full B2B social platform.

"Media / Press / Influencers" page

Complete restructuring of the page intended for journalists, media and influencers:

- Presentation of accreditation conditions
- Criteria for journalists
- Criteria for influencers
- Publication obligations
- Contact information
- Accreditation request form
- More readable organization of the currently very long content

"Contact" page

Creation of a professional Contact page including:

- Official address
- Phone number
- Email address
- Opening hours
- Social media
- Contact form
- Map correctly linked to the official address
- Practical information about the event

Informational and legal pages

Based on the elements provided and validated by your team:

- Privacy policy
- Cookie policy
- Terms of use
- Legal notices
- Information related to registrations and visitors
- Information related to exhibitors

The legal texts will need to be reviewed and validated by your team or your legal advisor before final publication.

◆ Features Included

Custom design and new visual identity

- Creation of a new art direction inspired by the world of health, beauty, innovation and premium events
- 100% customized design, not dependent on a standard WordPress or Elementor template
- Professional use of your logo's colors
- Selection of modern, readable typefaces
- Clear visual hierarchy
- Showcasing of exhibitors and partners
- More dynamic and better-structured sections
- Graphic consistency across all pages
- Full optimization for desktop, tablet and mobile

The objective will be to position Health & Beauty Expo as a serious, modern and professional international show.

Development of a simple custom administration panel

A secure and user-friendly administration panel will be created specifically for the management needs defined in this project.

This panel will allow authorized team members to update the predefined content of the website without needing to access or modify the source code.

Depending on their permissions, users will be able to:

- Add, edit, or remove exhibitors
- Update event information, dates, locations, and opening hours
- Modify predefined texts, images, and videos
- Update the external ticketing link
- View and manage requests submitted through the website forms
- Manage certain website information included in the agreed project scope

The administration panel will be a simple custom management interface created specifically for Health & Beauty Expo.

It will not be a complete website builder such as Shopify, WordPress, or Elementor. The client will therefore not be able to freely create new pages, design new layouts, or add completely new homepage sections through a drag-and-drop editor.

The content of the homepage sections already created as part of the project may be updated through the administration panel when those fields have been specifically included in the dashboard.

For example, the client may be able to change the title, text, image, button, or visibility of an existing predefined section.

However, creating a completely new section with a different structure, design, animation, or functionality will require additional development and may be subject to a separate Fiverr order.

Three access levels will be built in:

Administrator

- Access to all management features included in the dashboard
- User management
- Exhibitor management
- Event management
- Media management
- Form and request management
- Modification of the main predefined information
- Ticketing link management

Employee / staff member

- Modification of authorized predefined content
- Addition and updating of exhibitors
- Addition of photos and videos
- Viewing received requests
- Updating authorized event information

Organizer

- Access to authorized event-related information
- Viewing or updating associated exhibitors
- Limited access to the content and management functions required for their role

Each user will only have access to the features authorized for their assigned role.

Important clarification: The administration panel is intended to simplify the management of the website content and data included in this proposal. It is not intended to provide unlimited control over the website's design, structure, or development.

Event management

The panel will in particular allow management of:

- Event name
- Date
- Times
- Location
- Address
- Description
- Photos
- Videos
- Speakers
- Visitor information
- Ticketing link
- Publication status

The main edition included in this offer will be Rijswijk 2026.

The Paris 2027 page will be delivered as a static "coming soon" page. Advanced management of several simultaneous editions from the admin panel could be added later as a separate phase.

Exhibitor management

- Adding and editing exhibitors
- Logo upload
- Adding visuals
- Company description
- Categorization by specialty
- Contact information
- Activating or deactivating an exhibitor
- Featuring certain exhibitors
- Organizing the display order

Floor plan

- Integration of a static floor plan of the show
- Clear display on desktop and mobile
- Ability to download or open the plan
- Simple replacement of the plan from the admin panel

The creation of an interactive drag-and-drop system for moving booths is not included in this offer.

Multilingual site in five languages

The site will be configured in the following languages:

- Dutch
- Turkish
- English
- Russian
- Arabic

The Arabic version of the site will benefit from a specific right-to-left display adaptation.

Translations may be prepared with AI assistance, in line with your request. A final review by your team remains recommended, particularly for important medical, legal, commercial and event-related information.

Migration and restructuring of WordPress content

- Analysis of existing content
- Reuse of texts that are still useful
- Correction of outdated or inconsistent content
- Removal of unnecessary repetitions
- Restructuring of information
- Adaptation of content to the new design
- Migration of exhibitor-related information
- Migration of practical information

Old photos will not be automatically carried over, in line with your request.

New photos and videos provided by your team will be integrated into the site. If they are not yet available at the start, temporary premium placeholder visuals will be used so as not to block the design phase. They will then be replaced by the final media received during the development period.

Forms and notifications

- General contact form
- Fair Match form
- Press and media form
- Influencer form
- Exhibitor information request form
- Required fields and data validation
- Basic protection against automated submissions
- Forwarding of requests to the defined email address
- Confirmation messages for the user

Technical SEO optimization

- Correct structure of H1, H2 and H3 headings
- Meta titles and meta descriptions
- Clean URLs
- Content structure understandable by search engines
- Structured data suited to the event where relevant
- Image optimization
- Alt text
- Sitemap
- Indexing configuration
- Redirects of important old URLs where necessary

This optimization constitutes a technical and structural SEO baseline. It does not include a monthly SEO service, regular content creation, or backlink acquisition.

Performance, security and user experience

- Modern, lightweight architecture
- Smooth navigation
- Optimized image loading
- Responsive display
- Form validation
- Secure access to the admin panel
- User permission management
- Verification of links and buttons
- Testing across multiple screen formats
- Verification of display in the five languages
- Specific testing of the Arabic right-to-left display
- Verification before going live

Configuration and go-live

- Domain name connection
- Production environment configuration
- Site deployment
- Configuration of the main email addresses used by the forms
- SSL verification
- Final check before launch
- Assistance during publication

Costs related to the domain name, hosting, email services or paid third-party tools remain the client's responsibility.

◆ Recommended Technology

The project will be developed as a custom-built website, not as a new WordPress installation.

The recommended architecture will in particular include:

- A modern technology for the public site
- A secure database
- An authentication system with role management
- Organized storage of images and media
- A multilingual architecture
- An admin panel connected to the site
- A professional deployment environment

This approach offers more control, stability and room for growth than a site built solely with a WordPress theme and a page builder.

◆ Proposed Budget: USD 1,400

- Estimated standard price for this scope: USD 1,800
- Exceptional discount granted: USD 400
- Final price for our new collaboration: USD 1,400

This preferential rate takes into account our previous collaboration on Vitahart and the possibility of then continuing with your second event project.

And this rate covers the entire scope presented in this proposal:

- Custom graphic design
- Development of the public site
- Development of the admin panel
- User role management
- Event and exhibitor management
- Integration of the five languages
- RTL adaptation for the Arabic version
- Migration and restructuring of content
- Professional forms
- Mobile optimization
- Baseline technical SEO
- Full testing and go-live

Any costs related to hosting, the domain name or paid third-party services remain the client's responsibility.

◆ Payment Split into Three Milestones

Milestone 1 — USD 550 — 10 days

- Creation of the art direction
- Definition of the new visual identity
- Overall site architecture
- Creation of the first mockups
- Setup of the technical environment
- Development of the main structure
- Creation of the base admin panel
- Configuration of the Administrator, Employee and Organizer roles
- First design presentation for validation

Milestone 2 — USD 550 — 10 days

- Development of the public pages
- Creation of the homepage
- Creation of the About, Exhibitors, Tickets and Contact pages
- Creation of the Fair Match and Media pages
- Event management from the admin panel
- Exhibitor management
- Integration of the static floor plan
- Creation of the forms
- Integration of the external ticketing link
- Setup of the multilingual structure

Milestone 3 — USD 300 — 6 days

- Integration and restructuring of existing content
- Integration of available photos and videos
- Use of temporary premium placeholders if necessary
- Finalization of the five languages
- Full adaptation of the Arabic RTL version
- Mobile and tablet optimization
- Technical SEO optimization
- Testing of forms and user roles
- Verification of links and features
- Final corrections and adjustments
- Domain connection
- Site go-live

◆ Estimated Total Timeline: 26 Days

 **N.B.**

The 26-day timeline is planned in order to properly carry out the various phases of design, development, multilingual integration and technical verification.

Meeting the schedule will also depend on the timely delivery of the following elements:

- Logo and visual identity
- New photos and videos
- Final exhibitor information
- Official address and contact details
- Ticketing link
- Event-specific texts or information
- Access to the domain and necessary services

◆ Elements Explicitly Included in the Scope

- Complete redesign of the Health & Beauty Expo site
- Custom-built site
- New visual identity
- Seven main restructured pages
- Static Paris 2027 page
- Admin panel
- Three user roles
- Event management
- Exhibitor management
- Static floor plan
- External ticketing
- Fair Match as a page and form
- Five languages
- RTL adaptation for Arabic
- Reuse of useful text from the WordPress site
- Integration of new photos and videos
- Temporary premium placeholders if necessary
- Baseline technical SEO
- Mobile optimization
- Testing and production deployment

◆ Elements Not Included in the Initial Offer

- Payment of tickets directly on the site
- Generation of e-tickets
- Booth reservation system with payment
- Interactive drag-and-drop plan
- Automatic Fair Match matching algorithm
- Instant messaging between visitors and exhibitors
- Mobile application
- Advanced management of several simultaneous editions from the admin panel
- Advertising campaigns
- Social media management
- Monthly SEO services
- Legal drafting or validation
- Translations certified by a professional translator
- Subscriptions and third-party service fees

Any additional feature may be the subject of a new Fiverr order.

Important Notes

N.B. 1

The project will be developed on a custom basis according to the scope defined in this proposal. Any new feature or significant change not mentioned will require a new Fiverr order.

N.B. 2

The Paris 2027 page will be delivered as a static "coming soon" page. In this first version, it will not have full, independent management from the admin panel.

N.B. 3

The project may start with premium placeholder visuals if the new photos are not yet available. Their replacement with final photos is included once they are provided during the development period.

N.B. 4

Translations will be AI-assisted. The client remains responsible for the final validation of names, dates, medical information, legal texts and official communications.

N.B. 5

Advertising campaigns, Ads management and paid acquisition strategy are not included in my service. I focus exclusively on the design, development, technical configuration and optimization of the site.

N.B. 6

No commercial result, number of visitors, number of tickets sold or number of exhibitors can be guaranteed. These results will depend in particular on the event's reputation, communication, partnerships and the marketing strategy implemented by your organization.

N.B. 7

Medical content, treatment-related claims and information provided by exhibitors must be supplied or validated by them and by your organization.

N.B. 8

Technical support after delivery will be available as part of the work carried out, in particular to answer usage questions and make small adjustments related to the delivered features. New pages, integrations or features will be subject to a separate engagement.

What I Guarantee With This Offer

- ✓ A professional, entirely rebuilt event website
- ✓ A visual identity consistent with the health and beauty sector
- ✓ A clearer structure for visitors and exhibitors
- ✓ An admin panel suited to your team
- ✓ A modern, secure and scalable architecture
- ✓ An optimized mobile experience
- ✓ A professional integration of the five languages
- ✓ A solid foundation to develop future editions of the show

My goal is not simply to change the appearance of the existing site, but to build a genuine professional platform capable of strengthening the credibility of the Health & Beauty Expo with visitors, exhibitors, partners, media and influencers.

This proposal represents an excellent balance between the level of customization, the technical complexity, the multilingual scope and the investment required.

The discount offered takes into account our existing professional relationship and my wish to build a lasting collaboration with you across your various projects.
